

## **New! Nixle Emergency Communication System**

The City would like to introduce Nixle to all residents. Nixle is a notification system that offers instant information such as localized emergencies or relevant community advisories such as water main breaks, road closures, etc.

There are two ways to register for this free service. Using your mobile phone you can text the word Wyoming to 888777 or visit the City's website and click on the Sign Up! box in the Nixle widget at the bottom of the [home page](#).

The Nixle Emergency Communication System is replacing the old CodeRed system so if you were signed up on CodeRed, and want to continue to receive the advisories, you will need to sign up with Nixle.

If you have difficulties getting signed up or have questions email:
