

Storm Damage Yard Waste Pickup Policy (adopted September 2015)

If there is a city-wide severe storm that has caused damage to private property throughout the City of Wyoming, the City Manager may make a determination that storm damage should be picked up by the city. Call the City Administration Building on the first business day following the storm (Monday through Friday, 8:00 a.m. to 5:00 p.m.) at 821-7600 to verify if the determination to collect storm damage has been made. If the decision to collect debris has been made, the Public Works Department will pick up limbs and debris that can be moved from the yard to the tree lawn (the lawn between the sidewalk and the curb or equivalent area). Disposal of entire trees is not permitted. Yard waste and debris will be picked up beginning the first Monday, following the storm. If the storm occurs on a weekend, the pickup will begin one week from the first Monday. Public Works will make one pickup per household. You must have your debris at the curb by the first collection date in order to be assured your debris will be collected. If you do not have your debris placed at the curb by the pickup date, disposal of limbs and brush must be done through Rumpke on regular trash pick-up days (following yard waste collection guidelines).
